Maintenance Instructions for polished concrete Flooring.

The following maintenance requirements applies to Polished concrete floors:

1. In high traffic areas, clean daily. Use at a ratio of 1-40 DECOclean with preferably warm water. Spills to be cleaned with DECOclean from surface immediately after they occur.
2. For deep cleaning use at a ratio of 1-10 DECOclean. Areas where heavy soiling exist, it will require localized cleaning with DECOclean prior to cleaning entire area.
3. Machine options to use to clean with: a high speed burnisher or Auto Scrubber or Floor Progressor or mop. Depending on the size of the area.
4. Removal of tire marks or oil spillages may be done using DECOclean undiluted.

Re-application of DECO Stainstop is recommended after every 2-5 years depending on traffic usage.
